

LOTUS NEWSLETTER, No. 17, 1986

INTRODUCTION

Purpose: The Lotus Newsletter consists of informal communications of research information on Lotus. Reports of any phase of research on Lotus breeding, genetics, taxonomy, management, utilization or physiology are welcomed. Your biographic sketches and information about your research objectives, approaches, and progress including titles of your publications are encouraged; seed requests and news items are accepted.

This is the 17th year of publication for the Lotus Newsletter. Now is the time to consider contributing to the 18th edition of the Lotus Newsletter. Contributions are compiled without editing. Please follow the guidelines below when submitting your report or information:

1. Single space typewritten text on white 8 1/2" x 11" (21.5 cm x 27.5 cm) paper. Double space between paragraphs and tables. Do not number pages.
2. Leave a minimum of 3/4" (1.9 cm) on the left and bottom of each page.
3. On the first page of each contribution, indicate state or country, title of report, and name(s) of contributor(s).
4. Send contributions by December 31, 1987 to:

Lotus Newsletter
Dr. P. R. Beuselinck, USDA-ARS
Department of Agronomy
University of Missouri
Columbia, MO 65211
USA

Lotus Newsletter
Dr. R. L. McGraw
Department of Agronomy
University of Missouri
Columbia, MO 65211
USA

A WORD ABOUT THE 'MAILING LIST' SECTION

In this issue there is a rather extensive listing of Lotus researchers who receive the Lotus Newsletter. This section adds considerable cost to this publication, but your co-editors believe that you may not realize how many Lotus researchers there are in the world, let alone your own country. We are working on trying to update this listing, so if you recognize the name of someone who no longer conducts research on Lotus, or you do not see the name of someone who does, please inform us on the enclosed questionnaire.
