Private Bag, Palmerston North, New Zealand.

I have a request for seed of Lotus corniculatus of Mediterranean or similar origin, or of cultivars known to succeed under Mediterranean conditions. Some of these may prove useful under New Zealand conditions.

R. E. SEAJEM

Department of Agronomy, Cornell University, Ithaca, New York 14859, U.S.A.

I am interested in finding information on root reserves in Viking trefoil. There is quite a bit published on the cultivar Empire, but none that I can find on Viking. If you know of any work, published or unpublished, I would appreciate learning about it.
