

#### INTRODUCTION

Once again your Editor as a result of various committments has been slow in assembling this issue. I am planning to start preparing issue No. 4 by July 15, 1973, and so keep your contributions coming. It is a pleasure to report that considerable interest continues to be shown in the Newsletter with requests for issues coming from all parts of the globe. A greater number of contributions could be handled--send them to your Editor NOW for the next issue.

#### Contributions will be welcomed on:

- 1) New Techniques
- 2) Research notes, including abstracts of papers sent for  
publication
- 3) Short items not of sufficient stature for journal publication
- 4) Personal and Laboratory news
- 5) Requests for material
- 6) Announcements, meetings, etc.
- 7) Letters to the Editor
- 8) References to recent publications
- 9) Changes of address.
