International workshop

Integrating genomics into plant breeding.

J. SANJUAN and M. REBUFFO. LOTASSA: first glance of model to cultivated forage legumes	91
N. SANDAL, N. JØRGENSEN, S. DAM, G. NAUTROP, J. FREDSLUND, B.K. HOUGAARD, S. RADUTOIU, L. TIRICHINE, L.H. MADSEN, E.B. MADSEN, K. YOKOTA, P. ROMERO, A. JURKIEWICH, A. ALBREKTSSEN, E.M.H. QUISTGAARD, E. FUKAI and J. STOUGAARD. Utility of genetic and genomic resources from <i>L. japonicus</i> to cultivated species of <i>Lotus</i> .	92
M. UDVARDI, V. BENEDITO, J. ZHANG, J. MURRAY, I. TORREZ-JEREZ, R. CHEN, M. TADEGE, K. MYSORE, J. WEN, J. HE, P. ZHAO, Y. TANG, C.D. TOWN, G. WEILLER, K. KAKAR, M. WANDREY, Z. WANG and R.A. DIXON. Genomics of <i>Medicago truncatula</i> : advances and potential use in other species.	93
R. AKASHI, M. HASHIGUCHI, T. GONDO, J. ABE, T. AOKI, T. SAKAI, T. ANAI, A. SUZUKI. <i>Lotus japonicus</i> genetic and genomic resources in Japan.	94
M. MORETZSOHN, S. LEAL BERTIOLI, P. GUIMARÃES, L. MADSEN, J. FREDSLUND, B. HOUGAARD, L. SCHAUER, N. SANDAL, J. STOUGAARD, S. TABATA and D. BERTIOLI. Can legume synteny be useful in guiding the introgression of wild genes into cultivated peanut?	95
M.K. UDVARDI, D.H. SANCHEZ, J. KOPKA. Postgenomic tools for <i>Lotus japonicus</i> : Application to abiotic stress research.	97
M. BECANA. Oxidative stress as response to salinity and aluminum.	98
A.J. MÁRQUEZ, M. BETTI, M. GARCÍA-CALDERÓN, A. CREDALI, P. DÍAZ, O. BORSANI and J. MONZA. Nitrogen metabolism in <i>Lotus japonicus</i> and the relationship with drought stress.	99
H. RIDAY. Marker assisted selection in legumes	102
M. ANTOLIN-LLOVERA and M. PARNISKE. TILLING: Examples of utilization in plant breeding	103
M. REBUFFO, Consortium LOTASSA and Consortium LESIS. Breeding temperate legumes: advances and challenges	105

N. ALTIER. Diseases of forage legumes: advances and prospects of research on management strategies	106
F.C.B. VIEIRA, C. BAYER and J. MIELNICZUK. Effect of crop systems and nitrogen application upon soil acidification.	108
C. LABANDERA. Forage legume inoculation.	110
J. GOSSMANN. Signal transduction in plant-microbe interactions.	111
F.M.S. MOREIRA. Soil biodiversity: genetic resources to enhance nitrogen fixation in agriculture and forestry	112
W. AYALA. Forage and animal production in the region	114
C.G. FODERE. Seed industry requirements	116
M. LAGE and P. LAGE. Requirements from the MERCOSUR inoculants industry.	118
C. NABINGER. Animal production: an integrated point of view.	119
