

Lotus Newsletter, No. 8, 1977

Introduction

- a) Lead Article: We are thankful this year to Prof. D. A. Jones for his article on "Cyanogenesis in Lotus".
- b) New Chromosome Number: A new chromosome number for the genus Lotus, namely $2n = 10$, highlights the year 1977 (see report by M. E. Forde and G. de Lautour).
- c) Enclosure: Included with this issue of the Newsletter is a publication on "Growing Birdsfoot Trefoil in the Atlantic Provinces" (Canada) by J. E. Langille and J. S. Bubar.
- d) Cost of Newsletter: Increased postage and production has raised the cost of the Lotus Newsletter to \$2.00 per issue. No extra charge will be made to those who have paid in advance. The Newsletter will continue to be sent to those individuals from certain countries who are unable to contribute financially.
- e) Contributions: Now is the time to send information for the next issue -- recent published papers, news items, seed requests, technical notes, etc.
- f) Informal Reports: The Newsletter consists of informal reports which are presented to further the exchange of ideas and information. These may be opinions or suggestions rather than established facts. Before quoting any statement in a publication the author involved should be requested to give his or her consent.
